Question-1:

Write code and Connection in wokwi for ultrasonic sensor. Whenever distance is less than 100cms send “alert” to the ibm cloud and display in device recent events.

Solution:

Wokwi Simulation:

The screenshot displays the Wokwi web-based simulation environment. The interface includes a code editor on the left with an Arduino sketch for an ESP32, a simulation window on the right showing the hardware setup, and a console output at the bottom right.

Code Editor (sketch.ino):

```

1 #include <WiFi.h>
2 #include <PubSubClient.h>
3 void callback(char* subscribetopic, byte* payload, unsigned int
4 payloadLength);
5 //-----credentials of IBM Accounts-----

12 char publishTopic[] = "iot-2/evt/data/fmt/json";
13 char subscribetopic[] = "iot-2/cmd/test/fmt/String";
14 char authMethod[] = "use-token-auth";
15 char token[] = TOKEN;
16 char clientId[] = "d:" ORG ":" DEVICE_TYPE ":" DEVICE_ID;
17 WiFiClient wifiClient;
18 PubSubClient client(server, 1883, callback, wifiClient);
19 const int trigPin = 5;
20 const int echoPin = 18;
21 #define SOUND_SPEED 0.034

23 float distance;
24 void setup() {
25   Serial.begin(115200);
26   pinMode(trigPin, OUTPUT);
27   pinMode(echoPin, INPUT);
28   wifiConnect();
29   mqttConnect();
30 }
31 void loop()
32 {
33   digitalWrite(trigPin, LOW);
34   delayMicroseconds(2);
35   digitalWrite(trigPin, HIGH);

```

Simulation Window: Shows an ESP32 microcontroller connected to an ultrasonic sensor (HC-SR04) via three wires (red, green, and blue). The simulation is running, as indicated by the play button and the 99% battery level.

Console Output:

```

IoT Watson Platform:

The screenshot displays the IBM Watson IoT Platform interface. The browser address bar shows the URL: `zowha.internetofthings.ibmcloud.com/dashboard/devices/drilldown/195:883855?returnTo=/devices/browse`. The user is logged in as `dhanyarameshrgp@gmail.com` with ID `zowha`.

The main heading is "Device Drilldown - 883855". A left sidebar contains navigation options: Device Credentials, Connection Information (selected), Recent Events, State, Device Information, Metadata, Diagnostics, Connection Logs, and Device Actions.

Under "Connection Information", the following details are shown:

- Date Added: NOV 4, 2022 11:27 AM
- Added By: dhanyarameshrgp@gmail.com
- Connection Status: Disconnected

The "Recent Events" section includes a description: "The recent events listed show the live stream of data that is coming and going from this device." Below this is a table with the following data:

Event	Value	Format	Last Received
event_1	{"randomNumber":22,"temp":13,"hump":80}	json	a few seconds ago
event_1	{"randomNumber":51,"temp":24,"hump":47}	json	a few seconds ago
event_1	{"randomNumber":56,"temp":8,"hump":32}	json	a few seconds ago
event_1	{"randomNumber":56,"temp":8,"hump":47}	json	a few seconds ago
event_1	{"randomNumber":34,"temp":29,"hump":79}	json	a few seconds ago

At the bottom right of the events section, it states "2 Simulations running". The Windows taskbar at the bottom shows the date as 11/4/2022 and time as 11:30 AM.
